### General Description

Unstable weather, and the country is affected by the extension of a surface low-pressure system, accompanied by an extension of upper-air low-pressure system.

### Weather Today

Partly cloudy to cloudy, accompanied by some convective clouds with rainfall of different intensities over most areas of the country, and a decrease in temperatures. Light to moderate winds and fresh to strong at times with clouds causing blowing dust and sand reducing horizontal visibility. The sea will be slight to moderate, becoming rough at times with clouds in the Arabian Gulf and in Oman Sea.
